**Vision.**  
SVI4

### Seat height

Seat height adjustment is essential for a good posture and allows users of all heights to find their optimum sitting position.

The seat height should be adjusted to allow a 90° angle between your lower and upper legs, allowing your feet to be flat on the floor. Use the lever on the right hand side under the seat, lifting the lever up whilst taking the weight of the chair to raise and adding pressure to the seat to lower.

### Caring for your chair

To maintain the cloth upholstery carefully vacuum regularly.  
Marks and stains can be removed with the appropriate commercial cleaner.  
In order to avoid moisture stains when cleaning, we suggest gently rubbing the fabric in a circular motion, working from the centre of the stain with the cloth, and then moving slowly away from it until you have treated the entire panel of the affected area.
